

**git**

**GitHub**

# Git

Git is a free and open source **distributed version control system** designed to handle everything from small to very large projects with speed and efficiency.

Git is easy to learn and has a tiny footprint with lightning fast performance. It outclasses SCM tools like *Subversion*, *CVS*, *Perforce*, and *ClearCase* with features like cheap local branching, convenient staging areas, and multiple workflows.

# GitHub

GitHub is a provider of Internet hosting for software development and version control.

Development of the [GitHub.com](https://github.com) platform began on October 19, 2007. The site was launched in April 2008 by *Tom Preston-Werner, Chris Wanstrath, P. J. Hyett and Scott Chacon.*

It has been a subsidiary of Microsoft since 2018.

As of January 2020, GitHub reports having over 40 million users and more than 190 million repositories.

THIS IS GIT. IT TRACKS COLLABORATIVE WORK  
ON PROJECTS THROUGH A BEAUTIFUL  
DISTRIBUTED GRAPH THEORY TREE MODEL.

COOL. HOW DO WE USE IT?

NO IDEA. JUST MEMORIZE THESE SHELL  
COMMANDS AND TYPE THEM TO SYNC UP.  
IF YOU GET ERRORS, SAVE YOUR WORK  
ELSEWHERE, DELETE THE PROJECT,  
AND DOWNLOAD A FRESH COPY.

# Basic Vocabulary

- **Repository:** A place for storing "files". With Git, this means your code folder
- **head:** A "pointer" to the latest code you were working on
- **add:** An action to ask Git to track a file
- **commit:** An action to save the current state — such that one can revisit this state if needed
- **remote:** A repository that isn't local. Can be in another folder or in the cloud (for example: Github)
- **pull:** An action to get updated code from the remote
- **push:** An action to send updated code to the remote
- **merge:** An action to combine two different versions of code
- **status:** Displays information about current repository status

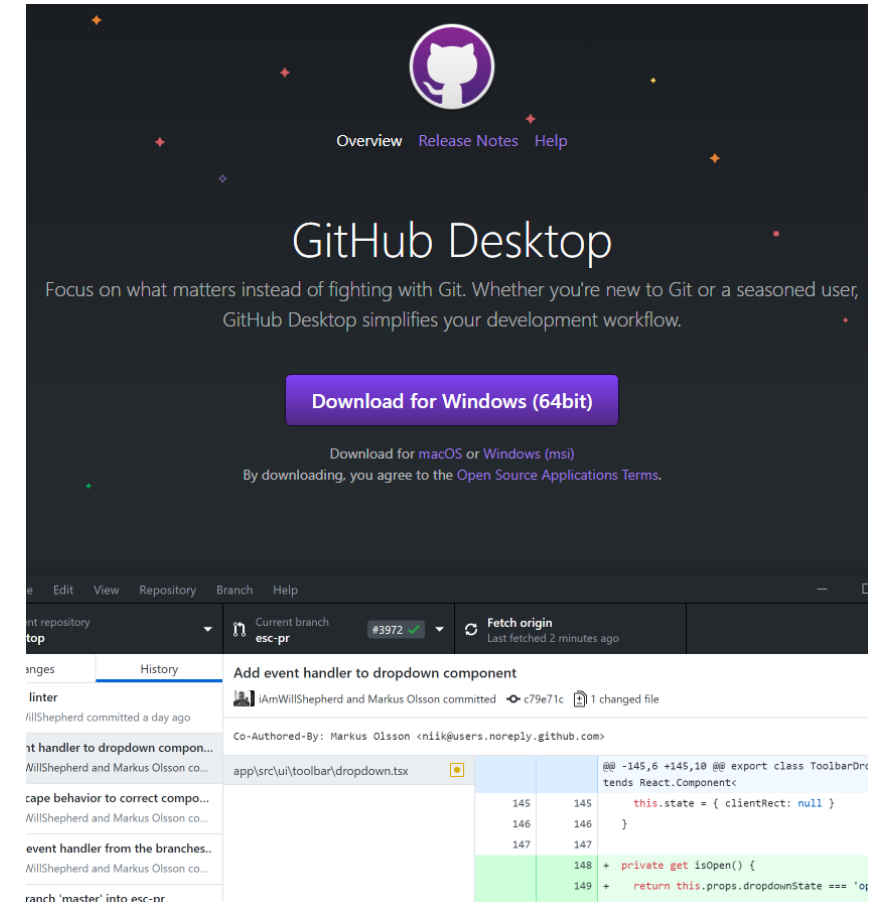

# GitHub Desktop

# GitHub Desktop

Focus on what matters instead of fighting with Git.

Whether you're new to Git or a seasoned user, GitHub Desktop simplifies your development workflow.

## Learning GitHub

Version control and collaboration  
with GitHub

*2 hr 11 min*

The screenshot displays the LinkedIn Learning platform interface. At the top, the 'in LEARNING' logo is on the left, followed by a 'Browse' button and a search bar with the placeholder text 'Search for skills, subjects or sc'. Navigation links for 'Home', 'My Learning', 'Notifications' (with a '99+' badge), 'Me', and 'EN' are on the right, along with a 'keo' logo. A dark sidebar on the left contains a 'Contents' menu with a close button. The menu lists sections: 'Introduction' (with a dropdown arrow), 'Version control and collaboration with GitHub' (1m 1s, selected with a radio button), 'Using lab.github.com' (2m 13s), '1. The Basics of Working on GitHub' (with a dropdown arrow), 'What is Git?' (3m 20s), 'What is GitHub?' (1m 55s), 'Exploring GitHub' (7m 25s), 'The GitHub workflow: Idea to commit' (4m 15s), 'The GitHub workflow: Pull request to production' (3m 20s), 'Get started with GitHub Learning Lab' (2m 44s), and '2. Working Locally with the Command Line' (with a dropdown arrow). The main content area features the course title 'Learning GitHub' and subtitle 'Version control and collaboration with GitHub'. It shows engagement metrics: 1,175 likes, 14,037 bookmarks, and 246 active learners. A large video player shows a thumbnail with a play button and a diagram of a workflow. Below the video are tabs for 'Overview', 'Q&A', 'Notebook', and 'Transcript'. At the bottom, the 'INSTRUCTORS' section lists 'Aaron Stewart and GitHub' (2 instructors) with their profile pictures, and the 'RELATED TO THIS COURSE' section lists 'Learning Groups' with a 'Show all' link.

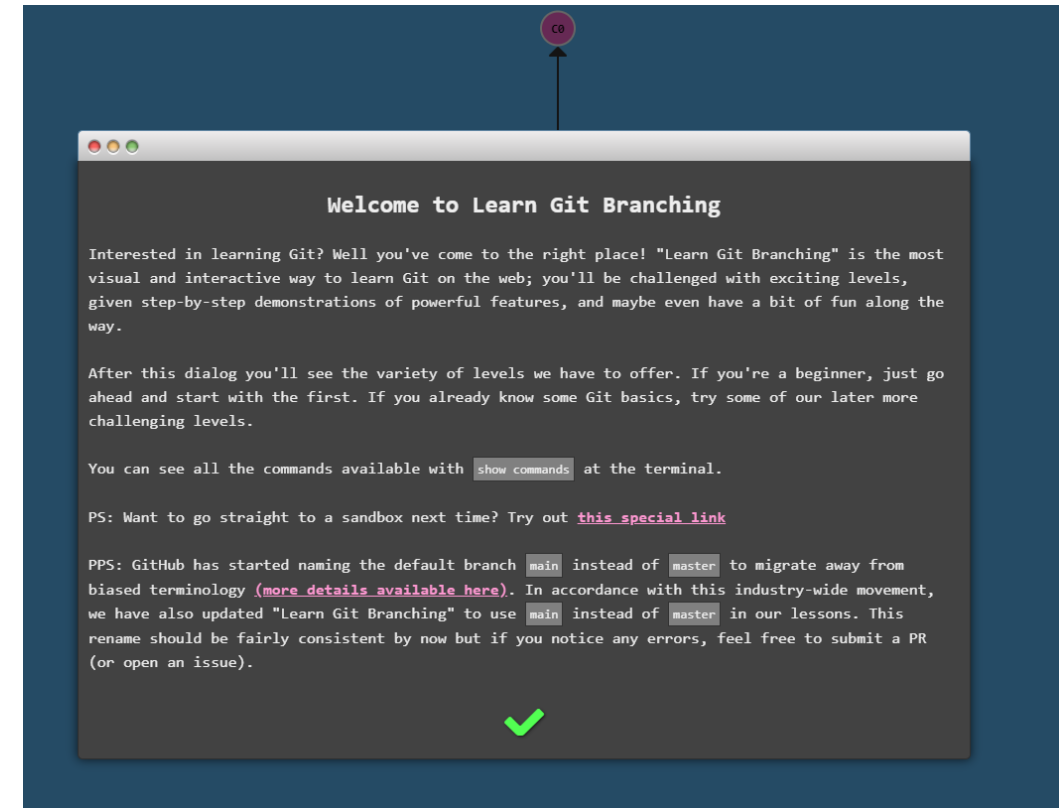

# Learn Git Branching

Interested in learning Git?

Well you've come to the right place!

"Learn Git Branching" is the most visual and interactive way to learn Git on the web; you'll be challenged with exciting levels, given step-by-step demonstrations of powerful features, and maybe even have a bit of fun along the way.
